

RUDRANATH KABIRAJ

DevOps Engineer | Terraform • Azure • Docker • Kubernetes • GitHub Actions
kabirajrudranath@gmail.com • +91 9064851835 • Dubrajpur, WB • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience in Terraform, Microsoft Azure, Docker, and GitHub Actions CI/CD. Completed full-stack development training (Jan–Aug 2024) and GATE CSE preparation (Sep 2024–Dec 2025) before transitioning to a focused DevOps track in early 2026 — building and deploying real projects throughout. Passionate about automation, cloud reliability, and scalable infrastructure design.

TECHNICAL SKILLS

Cloud & IaC	Microsoft Azure, Terraform (state management, modules, remote backend, Azure provider)
AI-Assisted Workflows	GitHub Copilot, Claude AI, ChatGPT — used for code review, debugging Terraform configs, and accelerating DevOps automation
Monitoring	Azure Monitor — metrics, alerts, and log analysis for cloud resources
OS & Scripting	Linux (Ubuntu), Shell Scripting (Bash) — automation for Docker & Terraform workflows
CI/CD	GitHub Actions, Git workflows, branching strategies
Backend	Node.js, Express.js, REST APIs, MongoDB, MySQL
Frontend	React.js, Redux, HTML, CSS, JavaScript, Vite, Tailwind CSS
Dev Tools	Git, GitHub, VS Code, tfsec, Docker Hub

PROJECTS

Cloud Infrastructure & IaC — Azure + Terraform | *Terraform • Microsoft Azure • tfsec • Bash • Git • Claude AI*

- ▶ Designed and provisioned a secure Azure cloud infrastructure using Terraform — including Resource Groups, Storage Accounts, and App Service — with reusable modules, input variables, and remote backend for state management.
- ▶ Integrated tfsec static security scanning into the Terraform workflow to detect and resolve misconfigurations before deployment; managed Terraform state via Azure Blob Storage across dev and production environments.
- ▶ Authored Bash automation scripts to eliminate repetitive infrastructure setup tasks; used Claude AI to review Terraform configs and debug errors — monitored resources via Azure Monitor for metrics and alerts.

Book Library — Containerized React App | hub.docker.com/r/rudra2000/book-library | *React • Vite • Docker • Nginx • Docker Hub*

- ▶ Built a React/Vite book management CRUD app with add, edit, delete, and search functionality using Redux for state management.
- ▶ Containerized using a multi-stage Docker build — Node.js builder stage compiles the React app, Nginx stage serves the optimized production build — reducing final image size to 93MB with proper SPA routing.
- ▶ Published Docker image to Docker Hub (rudra2000/book-library) — publicly pullable and runnable with a single command.

ShoppYGlobe — Full-Stack E-Commerce with CI/CD Pipeline | *React • Redux • Node.js • MongoDB • GitHub Actions*

- Built a full-stack e-commerce platform with React.js and Redux; integrated REST APIs for dynamic product data and real-time shopping cart.
- Set up a GitHub Actions CI pipeline for automated build and lint checks on every push and pull request; managed environment-specific config using .env files across dev and production stages.

YouTube Clone — MERN Stack Application | *MongoDB • Express.js • React.js • Node.js*

- Developed a full-stack video platform with secure user authentication, video upload/playback, RESTful APIs with Express.js, and MongoDB Atlas for data persistence.
- Implemented responsive UI with React.js and maintained Git branching workflow throughout development.

CERTIFICATIONS & TRAINING

DevOps & Cloud	Full-Stack DevOps Training — Terraform, Docker, Azure, GitHub Actions (Self-directed, Jan 2026–Present)
Full-Stack Dev	Full-Stack Web Development — HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB (Internshala, Jan–Aug 2024)
GATE Prep	GATE CSE Preparation — OS, DBMS, Networking, Algorithms, Computer Architecture (Sep 2024–Dec 2025); transitioned to industry DevOps focus in Jan 2026

EDUCATION

B.Tech in Information Technology Asansol Engineering College (MAKAUT)	2019 – 2023	85%
Senior Secondary (XII), CBSE Kashinath Lahiri Public School	2019	52%
Secondary (X), CBSE D.A.V Public School	2016	71%

ADDITIONAL

Currently building: Kubernetes (Minikube), Jenkins pipelines, Terraform Cloud, advanced Azure networking, AWS fundamentals, Claude Code, AI-powered DevOps automation

Open Source: Actively contributing Dockerfiles and GitHub Actions workflows to open source projects on GitHub

Languages: English (Professional), Bengali (Native), Hindi (Conversational)
